

VOICE 360

Parliamentary user flow

Full flow — 12 screens

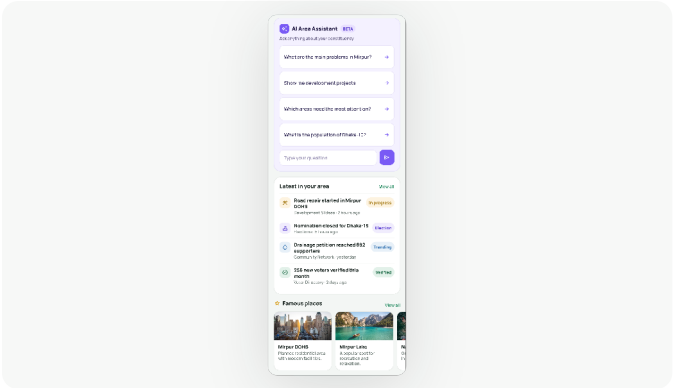

01 Area Overview **02 Voter Directory** **03 Communities** · Network · Invite · QR · Contacts
04 All Issues · Create **05 My Issues** **06 Current Representatives** **07 Nominated Candidates**

Every screen is shown once, full length, at the scale that fits the page.

GAP LIST

Missing flows

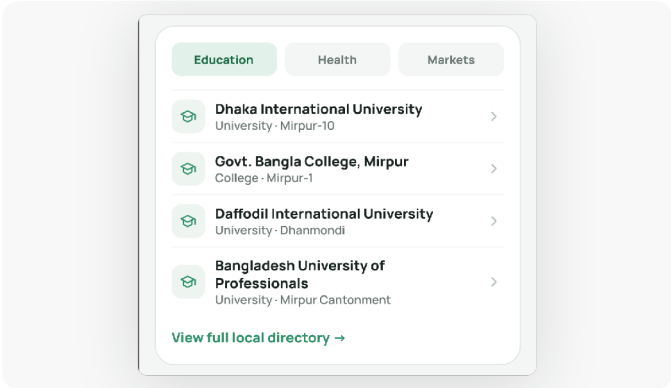

Eleven controls in the designed screens still have no destination. Search, notifications, message and call are out of scope.

M1 • M2 • M3

AI Area Assistant • Latest in your area • Famous places

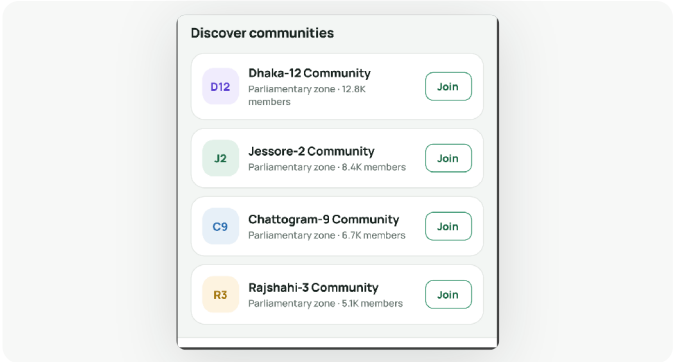

Prompts, the question field, View all and every row lead nowhere.

M4

Local directory

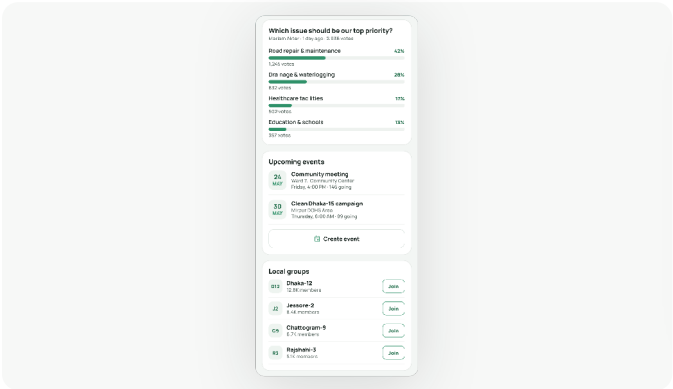

Row chevrons and "View full local directory" need a list and a place detail.

M5

Join a community

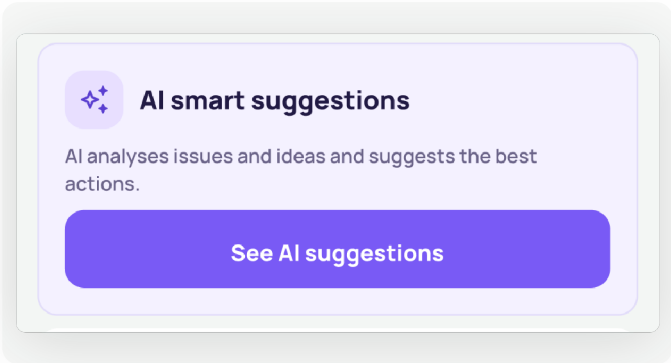

Join needs instant-join vs request-to-join, pending state and where the user lands.

M6 • M7 • M8

Poll voting • Events • Local groups

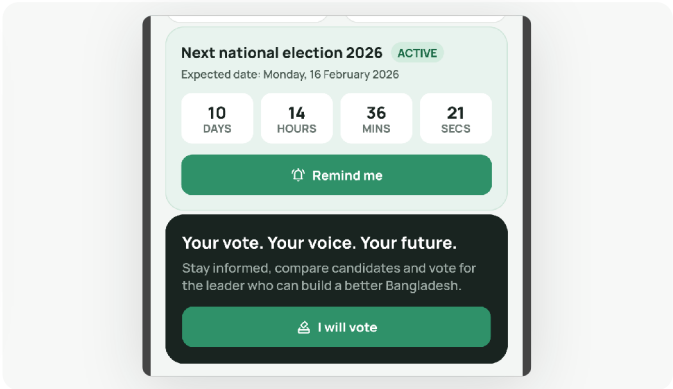

No un-voted poll state, no event detail, no Create event, no group join result.

M9

See AI suggestions

Needs the ranked result with reasoning and how a suggestion becomes an issue.

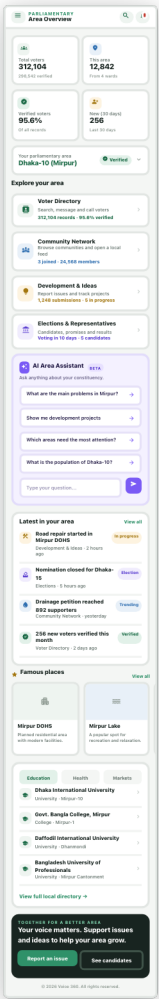

M10 • M11

Remind me • I will vote

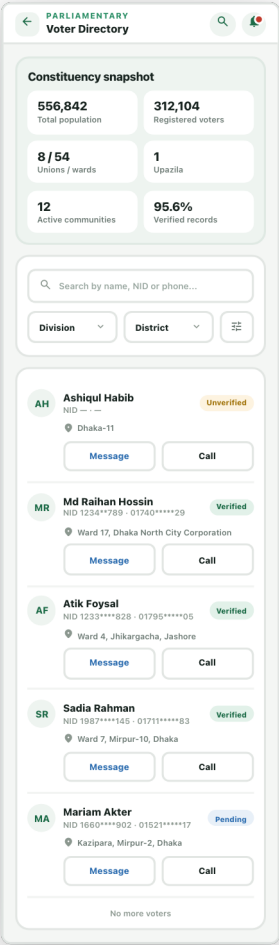

Both need a confirmation, settings and a "already set / pledged" state.

Area Overview

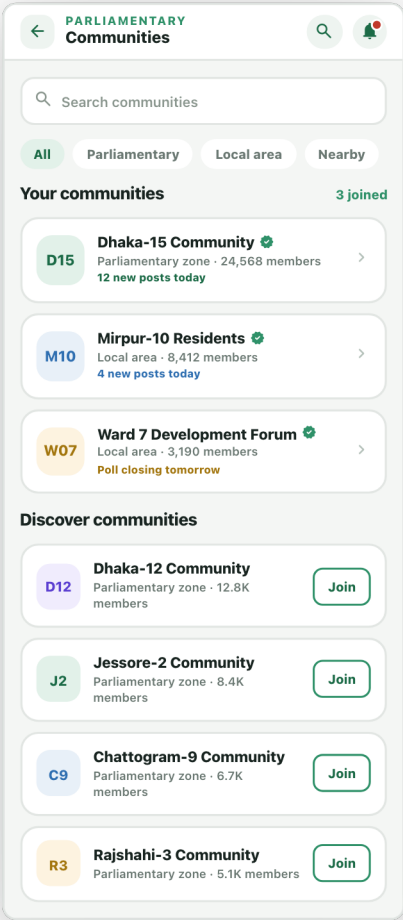

Voter Directory

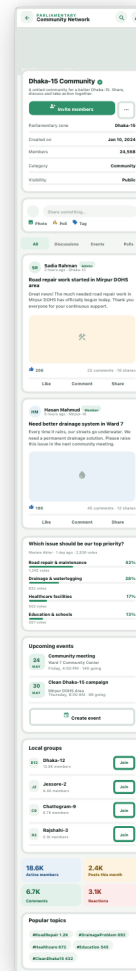

From 01 Area Overview · Voter Directory card
Goes to Message → chat · Call → dialler · filters stay on this screen

Communities

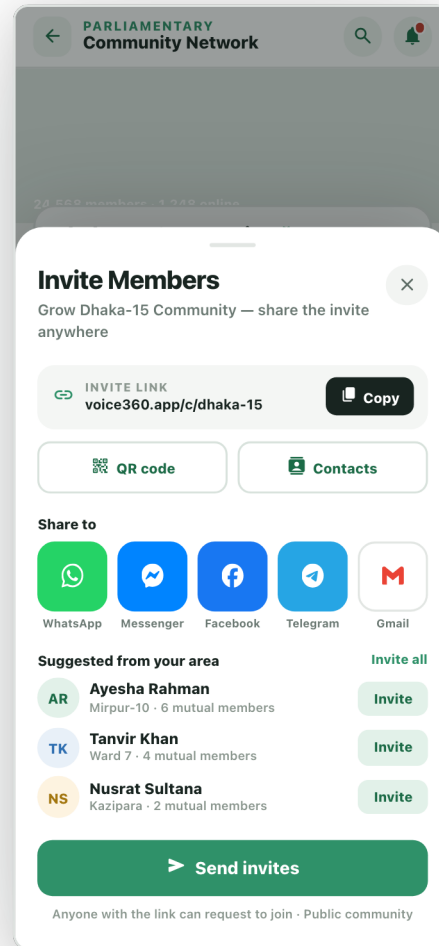

From 01 Area Overview · Community Network card · Community tab
Goes to any community row → Community Network · Join
