

Revised scope — 26 down to 14

14
NEW SCREENS

The Parliamentary Zone is a module inside Voice 360, not a standalone app. Anything that already exists elsewhere in the platform gets reused with the user's constituency pre-applied as a filter — building it twice would make the app repetitive and harder to maintain. Nine screens are removed, three are merged into screens we are already building.

14**Screens to design**

Unique to a constituency

3**Merged**

Follow-ups, RSVP, election activities

9**Removed**

Already exist in Voice 360

Membership is automatic

300 COMMUNITIES

One community per parliamentary seat — 300 in total, each titled by its area (Dhaka-17). No join request, no approval queue, no pending state. When a user verifies their profile and selects a constituency they are in: **"You are now a member of Dhaka-10 Parliamentary Community."** That single confirmation replaces three screens.

SHOWN ON
COMMUNITY HOME**Member since**SHOWN ON
COMMUNITY HOME**Constituency**SHOWN ON
COMMUNITY HOME**Member count**SHOWN ON
COMMUNITY HOME**Your role****THE PRINCIPLE**

A parliamentary community owns only what is unique to that constituency. Business Directory, Local Directory, Tourism, Professionals, Services, Marketplace and Jobs stay where they are — the community links into them with the constituency already set as the default filter. Lighter app, no duplication, one consistent experience across the platform.

The 14 screens we are designing

CONFIRMED SCOPE

AI Parliamentary Assistant

6 SCREENS

P01 AI Assistant Home

The entry point. Suggested questions · voice input · recent conversations · quick prompts

P02 AI Conversation

Chat · thinking state · area data and sources used · **follow-up questions asked inline (was P05)**

P03 AI Recommendation Detail

"Why this road should be repaired first" — priority score · budget estimate · residents affected

P04 AI Issue Generator

Conversation becomes an issue report in one tap — report to community, or save a draft

P06 AI No Data State

"We don't have enough information." Ask the community, or report manually

P08 Smart Suggestions

Ranked suggestions · reason · impact score · estimated cost · convert to issue

Local polls

3 SCREENS

P12 Create Poll

Admins only. Question · options · duration · visibility

P13 Poll Voting

Vote · preview · submit · results hidden until close

P14 Poll Results

Charts · participation · comments · share

Community events, updates & election intent

5 SCREENS

P15 Event Details

Agenda · organizer · location · attending — **RSVP going / interested / can't go and invite friends live on this page (was P16)**

P17 Create Event

Admins and moderators only. Title · description · location · date · privacy

P18 Latest Community Updates

Renamed from "Latest in your area" — not another news feed. Only posts from this constituency, with filters and categories. Tapping a post opens the existing Voice 360 post detail.

P24 Voting Reminder

Reminder date · election type · notification settings

P25 I Will Vote

Pledge · share · change mind · cancel. Unique to Voice 360 — worth designing carefully.

MERGED, NOT BUILT

P26 My Election Activities

Becomes a tab inside the existing My Elections — reminders, pledges, past and upcoming.

P09 · P10 · P11 Join request, Pending approval, Joined community	Membership is automatic from the verified profile, so there is nothing to request, approve or land on. Member since, constituency, member count and role all sit on the community home.
P07 AI History	Voice AI already keeps conversation history. No reason to run a second one.
P19 Update Detail	The post detail screen exists in Voice 360 — reuse it from the community feed.
P20 · P21 Famous Places, Place Detail	Belongs to Tourism & Explore, which already has both list and detail.
P22 · P23 Local Directory, Directory Detail	Both already exist. The community links into Local Directory with the constituency filter applied automatically.

What a parliamentary community owns

CONSTITUENCY-SPECIFIC ONLY

MP & representatives	Elections	Local announcements	Community issues	AI Parliamentary Assistant
Local polls	Community events	Constituency statistics	Public petitions	Constituency discussions

EVERYTHING ELSE OPENS THE EXISTING MODULE, CONSTITUENCY PRE-SELECTED

Business Directory · Local Directory · Tourism & Explore · Professionals · Local Services · Marketplace · Jobs · Nearby · News Feed. The community is an entry point with a filter, never a second copy of the module.

WHY THIS SCALES

300 communities on one shared platform, not 300 copies of a smaller app. Each constituency gets a genuinely local surface — its MP, its elections, its issues, its AI — while directories, tourism, services and commerce stay single-source. Fewer screens to design, fewer to maintain, and a better experience than Facebook Groups because the membership, the data and the filters are already correct for the user.
